

## CLAIMS

What is claimed is:

- 5 1. An apparatus comprising: a menu having an inner surface and an opposing outer surface;  
a plurality of transparent pockets mounted on the inner surface of the menu, each of the  
pockets adapted for receiving therein a printed insert; and a plurality of the printed  
inserts for insertion into the pockets, each said printed insert printed with one of:
  - 10 a) a song album title and a list of song titles corresponding to the song album title,  
and
  - b) at least one artist name with, for each of the artist names, a song title  
corresponding to the artist;and, a software program enabled for receiving user inputted song information and,  
therefrom, generating the printed inserts.
- 15 2. The apparatus of claim 1 wherein the software program comprises the interactive steps  
of: selecting one of a single artist and plural artists; receiving information including at  
least one of: at least one artist name, at least one album title, and at least one song title;  
and selecting and printing the printed inserts for fitting into one of a jewel case and the  
pockets.
- 20 3. The apparatus of claim 1 wherein the folder is enabled for folding to enclose the inner  
surface within the outer surface for compact storage of the folder.
4. An apparatus comprising in combination as a kit: a menu having an inner surface and an  
opposing outer surface; a plurality of transparent pockets mounted on the inner surface of  
the menu, each of the pockets adapted for receiving therein a printed insert; and a  
25 plurality of the printed inserts for insertion into the pockets, each said printed insert  
printed with one of:
  - a) a song album title and a list of song titles corresponding to the song album title,  
and

- b) at least one artist name with, for each of the artist names, a song title corresponding to the artist;
- at least one letter size card stock sheet perforated for tearing into a plurality of the printed inserts after the sheet is printed; and
- 5 a software program enabled for receiving user inputted song information and, therefrom, printing the information onto the sheet for generating the printed inserts.
5. The apparatus of claim 4 wherein the software program comprises the interactive steps of: selecting one of a single artist and plural artists; receiving information including at least one of: at least one artist name, at least one album title, and at least one song title;
- 10 and selecting and printing the printed inserts for fitting into one of a jewel case and the pockets.
6. The apparatus of claim 4 wherein the folder is enabled for folding to enclose the inner surface within the outer surface for compact storage of the folder.
